

# of thunks and state

```
// WidgetContainer.js
const adapt = createThunkAdapter(getAState);
connect(
  // ...
  {
    loadWidgets: adapt(loadWidgets)
  }
)
```

# of thunks and state

```
→ ~ npm install redux-thunk-state-adapter
```

```
import {  
  createThunkAdapter  
} from 'redux-thunk-state-adapter';
```
