

Using the bundle

Using the bundle

```
// reducers/index.js
import {
  reducers as AReducers
} from '@org/webapp-a';
import {
  reducers as BReducers
} from '@org/webapp-b';

export default combineReducers({
  A: AReducers,
  B: BReducers
});

export const getAState = state => state.A;
export const getBState = state => state.B;
```
