

handoff example

use middleware!

```
const handoffMiddleware = store => {  
  // previous slide ...  
  return next => action {  
    switch (action.type) {  
      case NAVIGATE_TO_WIDGET_DETAIL:  
        Handoff.setCurrentURL(  
          makeCurrentURL(store.getState(), action));  
      default:  
        break;  
    }  
    return next(action);  
  }  
}
```

summary

success (so far!)

definitely some hacks tho

some challenges

keeping up to date
training (web and mobile)
