

Bundling Issues

ES target is weird 🙈

Not that weird...

use external helpers, don't compile `async/await`

```
// in rollup.config.js
```

```
babel({
```

```
  // ...
```

```
  presets: [
```

```
    "react",
```

```
    ["es2015", { modules: false }],
```

```
  ],
```

```
  plugins: [
```

```
    "external-helpers",
```

```
    "transform-syntax-async-functions",
```

```
    // ... w/e else you want
```

```
  ]
```

```
})
```

```
// ..
```

# Bundling Issues

```
// in rollup.config.js
babel({
  // ...
  presets: [
    "react",
    ["es2015", { modules: false }],
  ],
  plugins: [
    "external-helpers",
    "transform-syntax-async-functions",
    // ... w/e else you want
  ]
})
// ..
```

# Bundling Issues

no `window` or `DOM`

use feature detection or move to components
