```javascript
// containers/SomeContainer.js
export default connect(
  createSelector(
    getAState,
    createStructuredSelector({
      widgets: getWidgets,
      selectedWidget: getSelectedWidget
    })
  ),
  {
    loadWidgets,
    selectWidget
  }
)(WidgetsListComponent);
```

```javascript
// containers/SomeContainer.js
export default connect(
  createSelector(
    getAState,
    createStructuredSelector({
      widgets: getWidgets,
      selectedWidget: getSelectedWidget
    })
  ),
  {
    loadWidgets,
    selectWidget
  }
)(WidgetsListComponent);
```
